

AMD Fab 36: AMD's New Flagship Fab

Expected to be the most advanced 300mm fab in the world when completed

Based on the superior manufacturing performance of AMD in Dresden

Planned for 65nm, 45nm and 32nm technology generations

Planned investment until 2007: ~\$2.5 Billion

November 2003: Groundbreaking

November 2004: Ready for equipment

March 2005: First wafer started

October 2005: Grand Opening

Now: Wafer production starts

2d-half 2006: 65nm volume production
